

ENHANCE THE POWER OF INTUITION WITH HYPNOSIS

with Carol Denicker, BCH, CI, OB

Learn to Trust the Inner Vision, Improve Decision-Making Ability, See the “Big Picture” and Teach Your Clients to Do the Same

Did you know that Albert Einstein said “The intellect has little to do on the road to discovery? There comes a leap in consciousness, call it intuition or what you will, and the solution comes to you, and you don't know how or why”. “The really valuable thing is intuition.” Sigmund Freud understood, “We communicated in a psychic fashion before we developed speech.” Another example of intuition at work was Conrad Hilton who trusted his hunch to build the first Hilton hotel and the rest is history!

Why develop your intuitive ability?

- For personal growth
- For the development and utilization of your innate resources
- To learn to trust your inner vision when you feel uneasy about someone or something
- Read people quickly and accurately
- Improve your decision-making ability
- See the ‘big picture’

Research shows that hypnosis can enhance intuitions:

- Positive hypnotic suggestion increases your confidence in your psychic ability.
- The more one believes in their ability, the better one scores on ESP tests.
- With hypnosis, we achieve an altered state of consciousness.
- In hypnosis, it is easier to access impressions from the subconscious mind.

Add another dimension to your existing hypnotherapy practice. Don't miss this unique, comprehensive and exciting intuition awakening day. You'll leave this workshop with the tried and true hypnosis and Ericksonian/NLP techniques you need to use the power of intuition to change your life and help others change theirs!

You Will Learn . . .
