Presented by Calvin Banyan, MA, CI, BCH, DNGH

Are you ready to take your hypnosis practice to the next level? Would you like to be counted among the best of the best in the profession? Then, certification in hypnotic age regression is a must.

Age regression hypnosis is the most powerful tool available to the hypnosis professional, period. Nothing gets to the root cause of the problem as quickly or as completely as age regression hypnosis done right. The key is to make sure that you are doing age regression hypnosis correctly for maximum benefit. This is where Cal Banyan's "Hypnotic Age Regression Certification Course" comes in.

Basic and entry level hypnosis certification courses simply don't spend much time teaching this most powerful tool; in fact, it usually gets only a brief mention. There simply isn't enough time, and new students are simply not ready for this kind of advanced training. But, now is the time for you to take this next step in your professional development because Cal, the highly recognized authority in the use of hypnotic age regression work is teaching this very special Age Regression Certification course that covers everything you need to know to be among the best age regressionists in the world.

Cal Banyan is teaching this course because NGH Convention attendees have begged him to do it. He has written countless articles on the subject, and taught seminars about it, and in the past, to get this training you had to take his full 7-day course to get this information. Finally, here it is, a complete certification course on the skill set required to do expert level age regression hypnotherapy. This two-day intensive certification course may never be offered again.

Most importantly:

Others have copied his advanced techniques, but no one can teach them like Cal Banyan, who will show you everything step-by-step, with classroom demonstrations, videos of real sessions with real clients, plus your own supervised practice.

You will have everything you need to begin using and mastering this most powerful tool in your hypnotherapy practice, confidently and competently.

Don't Miss Out!

Hello, this is Cal Banyan and I want to see you in this professional age regression certification course.

Here is why you must act and enroll in this special course. I usually reserve this high level of training only for those who are in my 7 or 10 day certification courses. But I thought I think it would be fun and beneficial to teach a two day course that focuses exclusively on the one hypnotic procedure that is the most powerful, and the most versatile.

I promise to not only teach you the fundamentals, but I will show you insider techniques that only 5-PATHers or those who work at my center learn. Mastering age regression, the way I'll show you how to do it, turns each client into a mystery novel, and you become the master detective, who can reliably find the cause of the problem in your client's past and resolve it masterfully. Take this certification course and I'll personally show you how.
