All-levels

Many clients come to sessions with issues that they would rather have fixed than wanting to reveal details about. This hinders the healing process and sometimes it can stop it altogether. Content free therapy is a generic term which encompasses different methods that can be used by the hypnotist to achieve excellent results without getting too much information from the client and at times, none at all. Eugen Popa will give a brief introduction to these methods and, time allowing, even do a short demonstration.

Elizabeth Campbell, BCH, CI

All-levels

Hypnotists and energy workers have a tendency to 'pick up' the energy of the people they help. Combining her background in hypnotism, bodywork, NLP and energy work, Elizabeth teaches you how to perform an energy break to separate from the client's energy field at the end of each session, and how to ground and clear your own energy field at any time. She introduces easy, safe bodywork that allows your body, mind and energy field to emerge grounded, refreshed and recharged.
